

Power Fluids PF Diesel Treatment™ is precision engineered to be the most complete, cost effective Diesel Treatment on the market. Only **PF Diesel Treatment™** gives you superior lubrication, water removal, anti-gel and an algicide in one easy treatment for your ULSD (Ultra Low Sulfur Diesel).

PF Diesel Treatment™ can be used in diesel trucks, cars, pickups, heavy equipment and all marine or stationary diesel engines. **PF Diesel Treatment™** keeps the fuel fresh and can be used bulk storage tanks.

PF Diesel Treatment™ is precision engineered to increase Cetane for additional horsepower. **PF Diesel Treatment™** puts the lubricity back in ULSD diesel, without sulfur, providing the proper lubrication to critical components such as pumps, injectors, upper cylinder walls, ring lands and even exhaust valves, stems and guides. **PF Diesel Treatment** is engineered with a powerful advanced nano-water removal technology that works to remove water more effectively than any other treatment available. Plus, **PF Diesel Treatment** contains no alcohol and works to protect the seals and gaskets of the engine and fuel system components.

PF Diesel Treatment™ is the complete diesel fuel treatment, containing an algicide to kill algae coupled with our advanced water removal technology that removes moisture from the fuel and helps retard algae growth. **PF Diesel Treatment™** contains an anti-gel that keeps fuel from gelling in low temperatures, even when the temperature drops suddenly and without warning.

PF Diesel Treatment™ is engineered with an effective atomizer that helps fuel burn more uniformly while it cleans out carbon deposits and reduces emissions. **PF Diesel Treatment™** keeps fuel lines injectors, pumps and tanks clean and operating efficiently. **PF-1™** engineered metal conditioner in **PF Diesel Treatment™** is just one of the essential ingredients that separate **PF Diesel Treatment** from the competition. It provides unequalled lubrication and protection to critical engine fuel system components to keep those components operating efficiently and trouble free and it is non-corrosive to metals and other materials used in fuel system components such as fuel meters.

PF Diesel Treatment™ is engineered to be the most complete, cost effective Diesel Treatment on the market. Economical to use; only 1oz to every 10 gallons of fuel; requires no special mixing and you cannot over treat. What makes Power Fluids Diesel Treatment better than the rest? Power Fluids offers the only product with the scientifically engineered **PF-1 Metal Conditioner**.

BENEFITS:

- **INCREASES CETANE, INCREASE HORSEPOWER**
- **LOWER MAINTENANCE COST**
- **LUBRICATE EXHAUST VALVE STEMS AND GUIDES**
- **RESTORE LUBRICITY WITHOUT SULPHUR**
- **REDUCE EMISSIONS**
- **NEUTRALIZER HELPS CONTROL DANGEROUS ACIDS FORMED DURING COMBUSTION**
- **CONTROLS WATER**
- **ELIMINATE DRY STARTS AND COLD STARTS**

CONTAINS NO SULPHUR, NO ALCOHOL
